

## CCHHI – Class: File Size and Resizing Images

Demystifying Digital File Size, Re-Sizing and Resolution.

Date: February 6 & 8 from 3:30pm to 5:30pm

Location: OLLI Center, 2 Mathews Court, HHI

Duration: 2 sessions of 2 hours

Format: class/exercises

Level: all

**Fee:** \$50 (members), \$60 (as a guest). Payable by check to CCHHI. In order to secure your place, mail your payment to: CCHHI, P.O Box 5683, HHI, SC 29938 (please write in memo line of your check “File Size”). Online Registration click here: [File Size - 2018](#)

Instructor: Jean-Marie Cote – email: [cchhiedu@gmail.com](mailto:cchhiedu@gmail.com)

Class size: fill to capacity

**Summary:** If understanding pixels, ppi, dpi, ratio and image file size and resizing is a challenge or a nightmare, this class is for you. No complicated math, just basic common sense and practical exercises will help you to master these concepts. Next time you are asked to deliver your image file to some specifications, you will know what to do.

### **Class Program:**

The digital camera has introduced a lot of new words and concepts, as well as digital files. The images or files come in many different formats, sizes and resolutions which is, for most people, a mystery. Even some experts, are confused with this new world full of pixels. This class will explain these concepts in simple terms and with concrete examples that will help in demystifying the digital world.

The class is structured in the following manner:

Part One (2 hours) will focus on the concept and understanding of the pixel’s world. Students should be able to wrap their head around the digital dimensions of file size and quality. This part is pure theory with some hands-on exercises.

Key topics: Pixels count vs file size; Resolution; Quality; Document Size.

Part Two (2 hours) will focus on “HOW” to do it. Once you understand and can visualize the theory of pixels, image quality, volume etc.. now it is time to learn how to do it using different applications such as Photoshop, Lightroom, Microsoft picture and other several other marginal apps. These applications and methods are both applicable to Win or Mac environment. If time permits we will also talk about email system and attaching file to an email vs embedding it with.

Key topics: Image sizing/resizing; Resolution; Quality; Printing; Emailing.
